

# ENERGY OMBUDSMAN QUEENSLAND

## Keep cool, but keep costs down

Don't let a high energy bill raise your temperature this summer

Being energy efficient during the hotter months can save you money on your energy bills.

- Replace worn or damaged fridge seals
- Buy appliances with high star ratings
- Use energy-efficient light bulbs
- Set your air conditioner at 24 degrees
- Switch appliances off at the wall
- If you're not using it, turn it off

The Energy Ombudsman Queensland is a free and independent dispute resolution service for Queensland energy consumers who have been unable to resolve a complaint with their energy supplier.
